

OFFICE OF GROUND WATER
AND DRINKING WATER

When is it?

SEP 17, 2020
2-3 PM EDT

How do I register?

Through the following link:

<https://attendee.gotowebinar.com/register/1779900827253473550>

Who should attend?

This webinar is open to water systems, states, primacy agencies, tribes, community planners, academia, and those seeking to better understand the tiering criteria and site selection requirements of the Lead and Copper Rule.

SAMPLE SITE SELECTION

Lead and Copper Rule

EPA is hosting a webinar on the site selection for lead and copper tap water monitoring under the Lead and Copper Rule.

The webinar will discuss some general steps water systems can take to ensure robust site selection by focusing on how to identify sites with lead service lines, lead plumbing, and/or copper plumbing with lead solder, as well as methods to verify sites in the field.

The goal of the first webinar will be to provide a better understanding for locating and verifying appropriate tap sample sites.

Where do I find more information?
